-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 1-12 are again rejected under 35 U.S.C. 103(a) as being unpatentable over Thorsteinson et al for the reasons of record.

Claims 1-12 are again rejected under 35 U.S.C. 103(a) as being unpatentable over Thorsteinson et al in view of Kirk-Othmer for the reasons of record.

Applicant's arguments filed 1-12-2005 have been fully considered but they are not persuasive. The catalysts recited in the instant claims and made in its examples are not distinguishable from those recited in the major reference and made in its working examples. There is no indication that the potassium is present in any different way therein.

Although the major reference doesn't mention specifically any other olefin than ethylene, its broad disclosure relates to olefins. This teaching must be considered. Therefore one of ordinary skill in the art would immediately envision performing the reaction with propylene, which is the next higher olefin. There is no combination of references involved or necessary in the obviousness rejection using the main reference alone. The only reason that an anticipation rejection wasn't made is that propylene wasn't specifically recited.

Silver catalyzed combination of oxygen with olefins of greater carbon number than ethylene to form the corresponding epoxide is known to give lower yields. This is shown in Kirk-Othmer at p. 288.

Applicants have not shown any results that are unexpected.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1625

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bernard Dentz whose telephone number is 571-272-0683.
